Building Hope & Eradicating Leprosy One Family at a Time

Annual Report
2016 - 2017

You provided HOPE in the most practical way...
(above photo: a mother receiving medicine for her child.)

Your generosity is bringing

HOPE
HEALS:

13,063 Patients Seen
22,000+ Villagers Encouraged

HOPE
GROWS:

1,000+ Leprosy Patients Evaluated
550 HIV & Home Tests Given

HOPE
EMPOWERS:

13 Native Employees
1 Revolutionary Project Planned

HOPE
TRANSFORMS:

4,642 Encouraged with Prayer
74 Sponsored Children

HOPE
DREAMS:

1 Great Sponsor Like YOU
Summer Medical & Teaching Team

hope across the world!

For every \$10 you gave a person was given access to the clinic and life changing medicine. Moms, dads, children, and grandparents all recieved medical care that was previously unavailable to them, the poorest of poor in Ethiopia.

Your giving caused even more giving to happen! The Ethiopian government recognized the effectiveness of the clinic by partnering with it to do door-to-door HIV & TB testing in the village.

Your giving is empowering people in their own community to save lives. In 2018, Project Hope is bringing business men and women to Gendetesfa to prepare for a new microfinance project that will help locals start their own businesses.

Your giving touches, the body, heart and soul! Our clinic is really a community center where people share their burdens and personal needs. Our staff prays with patients and connects them to support beyond medicine.

Your continued and increased giving can cause hope to grow to the next level. We are looking to add more physician hours at the clinic and send medical and education teams this summer. Our budget is \$70,000 and your giving can make the dream come true!

Would you consider
a new or increased
gift for this upcoming
New Year?

HOPE CHANGES LIVES

THE NEED IS GREAT

In a village over 7,000 miles away there are parents who have the same future hope for their children as parents here in America. That village, outside of Dire Dawa, Ethiopia, is called Gendetesfa and it means **"Place of Hope."**

The average worker there earns **\$2 per day**, but sadly it costs a family of four an average of \$3.50 per day to eat.

There are two working water wells for the over **22,000 people** who live there. And yet there is an even greater threat to their community.

Leprosy plagues this village and nearly every household. Why? Because this village was founded in the mid-1900s for lepers who had nowhere else to turn. The village has grown to over **22,000 people** who need an answer that is not expensive to give.

THE CLINIC

The Ethiopian government will provide free leprosy medicine to any government-approved clinic. This is where the Project Hope Clinic enters the story. This Christian clinic is located in Gendetesfa and that offers **FREE** medical care to anyone in the village. Below are the results of the first four years of clinic service:

20% decrease in infectious disease in the village

60% of the village has visited the clinic

60% decrease in length of hospital stay because of early detection and care

100% of patients have received free medical care
